

CAMARILLO MIRAMONTE HOA Satellite Dishes and/or Private TV Antennas

The Association has a policy that NO SATELLITE DISHES OR PRIVATE TV ANTENNAS ARE TO BE ATTACHED TO THE BUILDINGS ABOVE THE ROOF LINE. Therefore, you must remove any satellite dish or antenna that violates this policy. These devices must be placed within the homeowners private use area (deck or patio) and located or attached in some way that the buildings waterproofing envelope is not compromised. Should we find that they violate the policy OR are a source of water intrusion into the structure they will have to be removed and/or fixed. Should this happen the owner may need to contact their satellite company and have the dish or antenna redirected or reinstalled.

If a satellite dish or cable is installed illegally, the homeowner will be responsible for damages to the common area property. Homeowners must make sure they obtain approval from the Association before the installation of any satellite or cable service.
